

# Business Services for First Nations Partners

MARCH 2023

## REALIZING OPPORTUNITIES TOGETHER

Mosaic Forest Management is proud to provide industry-leading professional forestry and sales services that deliver global market access to First Nations communities, woodlot owners, community forests and private landowners.

Our skilled team of professionals is client focused – we work with First Nations partners to establish plans and service agreements through open and clear communication, with a firm commitment to transparency. Our partners benefit from our experienced team of professionals as well as our unparalleled global market access and in-country representation in major Pacific-Rim markets including British Columbia, Japan, China, Korea and the United States.

## PARTNERSHIP BENEFITS:

- **Mature, proven management systems** and protocols ensure safe forest operations that meet all environmental requirements, while maximizing financial return to land owners and licensees.
- **Access to established, professional contractor community** experienced in all types of harvest systems ranging from helicopter logging, cable yarding and ground based systems.
- **Access to domestic and global customer base**, transportation infrastructure networks, and industry leading market intelligence.
- **Committed to working with first nations partners** over the long term to further develop their in house expertise in forestry to benefit their communities.

## Mosaic Forestry Services

- Securing government permits and ensuring regulatory due diligence.
- Managing all government application processes including road permits, cutting permits, Forest Stewardship Plans coordination and compliance, and the full scope of forest licence applications.
- Managing phytosanitary obligations and other international market export requirements.
- Leading forest practices backed by third-party certification, ensuring best practices are implemented across our operations.

## Forest Planning, Harvesting and Silviculture

- Access to our professional experts including Registered Professional Biologists, Registered Professional Foresters and Forest Technologists, Professional Engineers, hydrologists, geotechnical specialists, environmental monitors, and archeologists.
- Field engineering and Timber Evaluation to optimize your operational plans to generate long-term, strong financial returns.
- Managing Visual Impact Assessments, operational plans and GIS technical support.

## Market Access

- Access to sizeable system of strategically-located dryland sorts and sophisticated log transportation network.
- Use of deep water ports for break-bulk or container based ocean frights.
- Cost competitive transportation options to secure product to global markets.

## Sales and Marketing Support

- Sales expertise and market intelligence, providing strategic advice on prime markets by product.
- Expert log quality assessments and valuation.
- Regular and transparent reporting on production, financial return, accounting and management of stumpage.
- Adaptable legal agreements that meet the needs of our partners.

## PROGRESSIVE ABORIGINAL RELATIONS CERTIFICATION

Canadian Council for  
Aboriginal Business 

Forest Management is proud to be recognized for our leadership as a partner for Indigenous peoples through Progressive Aboriginal Relations (PAR) Certification.

PAR certification, a program of the Canadian Council for Aboriginal Business, crystallizes our commitment to pursuing highly-constructive partnerships with First Nation communities.

By being PAR certified, Mosaic Forest Management demonstrates through independent oversight that we are a committed partner with the policies, systems and resources dedicated to achieving positive outcomes in our Indigenous relationships.

PAR evaluates Mosaic's initiatives and outcomes in four key performance areas:

- Leadership actions
- Employment
- Business development
- Community relations
